

THE PRODUCT, IN MOTION

Six flows. *Six moments* where chaos becomes clarity.

This is what a day with Munshi actually looks like. The owner, the worker, the vendor — each on WhatsApp, each speaking their own language, each part of one orchestrated system.

01 Owner *onboarding*

DAY 0 → 14

02 Daily owner *experience*

AAJ KYA HUA?

03 Worker on the *ground*

IN THEIR LANGUAGE

04 Vendor *coordination*

ORDER → CHASE → CONFIRM

05 AA bank *linking*

CONSENT → FETCH → RECONCILE

Live in *two weeks*. No app. No training.

Meet Rajesh. Owns Sharma Mithai, a 45-person sweet shop chain across 3 Indore outlets. Heard about Munshi from a fellow trader. Two weeks later, his business runs differently.

Day 14: Rajesh's daily WhatsApp time on follow-ups has dropped from 3 hours to 8 minutes. The business hasn't shrunk — the coordination layer just moved off his shoulders.

7:30 AM. *Aaj kya hua?*

The owner opens WhatsApp. Munshi has already done a full sweep of the business — attendance, sales, cash, inventory, escalations. **One message replaces three hours of follow-up calls.**

Munshi • Sharma Mithai

online · last sweep 7:28 AM

 Good morning, Rajesh ji. Aaj ki summary:

Attendance

- ✓ All 12 staff present at Vijay Nagar
- △ 2 absent at Palasia — Ramesh & Suraj. Replacement called.

Yesterday's sales

₹1,84,500 (8% above last Friday)
Top: Kaju Katli (₹42k), Soan Papdi (₹28k)

Cash position

₹8,42,000 in current account
₹62,000 owed to 4 vendors

Needs your attention

- Pista stock at Vijay Nagar — 2 days left
- AC service overdue at Palasia

7:30 AM ✓✓

Pista ka order Jain Brothers ko karwa do, 8 kg

7:33 AM ✓✓

✓ Done. Order placed with Jain Brothers — 8 kg pista @ ₹1,150/kg. Delivery tomorrow 10 AM. Confirm karunga jab ship hoga.

7:33 AM

BEHIND THE SCENES

One message. *Eight workflows.*

Attendance check, sales reconciliation, cash position from AA, vendor payment tracker, inventory monitor, escalation router — all aggregated into one human-readable summary.

THE SHIFT

From *asking* to *knowing*

The owner used to make 15-20 calls every morning. Now they read one message and act on three things that matter.

TIME SAVED

3 hrs → 8 minutes

Munshi customer interviews (n=60): average follow-up time before Munshi was 3+ hours/day. After two weeks, under 10 minutes.

No app. *No training.* In their language.

Suresh works the morning shift at the Palasia outlet. Reads Hindi, not English. Uses a Jio phone. He's never installed a business app in his life — and he never has to.

Munshi • Sharma Mithai • Palasia
Hindi • voice supported

 **Namaste Suresh ji.** Aaj subah ki delivery aa gayi kya? Jain Brothers se 8 kg pista?
8:42 AM

✓ Verified. 8 kg confirmed. Quality good. Stock updated.

Aaj ki to-do:

- 9 AM — Counter open + cash count
- 11 AM — Lunch prep (100 each)
- 4 PM — Stock check

8:52 AM

11:14 AM

✓ Mil gaya. Aap keh rahe hain: "Kachori ka tel khatam ho raha hai."

Theek hai — Jain Brothers ko bol diya, sham tak 5L oil pahuch jayega.

11:14 AM

 PHOTO • PISTA DELIVERY

Haan aa gaya. 8 kg.

8:51 AM ✓ ✓

 0:14
(Voice note in Hindi)

11:14 AM ✓ ✓

MULTIMODAL
Photo. Voice. *Hinglish.*

Workers respond the way they already talk on WhatsApp. Voice notes in Hindi, photos of stock or deliveries, mixed Hinglish text. Munshi handles all of it.

VERIFIED, NOT ASSUMED
Proof of work

The photo of the delivery isn't just stored — it's parsed. Quantity counted. Quality flagged. Compared against the PO. Owner gets a verified result.

NO LITERACY BARRIER
Voice in 4+ languages

Hindi, Tamil, Gujarati, Marathi today. For workers without smartphones, Munshi calls them on voice telephony. No worker left behind.

Munshi chases vendors so *you don't have to.*

Mukesh ji handles AC servicing for Sharma Mithai. He's old-school. Refuses to use new apps. Has been promising the Palasia outlet service for two weeks. Munshi handles him — on WhatsApp, the same way the owner would.

Munshi → Mukesh AC Services
on behalf of Sharma Mithai

🙏 Mukesh ji namaste. Rajesh ji ke Palasia outlet ka AC service abhi pending hai — 12 days ho gaye. Aaj kal mein aa sakte hain?

10:15 AM ✓✓

Bhai busy hu. Parso aaunga.

10:42 AM

Parso pakka? Rajesh ji ko confirm karna hai. Time ka idea ho to bata dena.

10:43 AM ✓✓

Han pakka. Subah 11 baje.

10:55 AM

✓ Theek hai. Wednesday 11 AM — confirm kar diya. Late ho rahe ho to ek WhatsApp daal dena, Rajesh ji ko bata dunga.

10:55 AM ✓✓

Internal — to Owner

✓ Mukesh ji confirmed. AC service Wednesday 11 AM at Palasia. Calendar mein add kar diya. Status: **scheduled (12-day delay resolved).**

10:56 AM

ZERO VENDOR FRICTION

No new tool for the vendor

Mukesh doesn't install anything. He doesn't know it's not Rajesh messaging him. The conversation is normal. Vendor adoption barrier: zero.

PERSISTENCE

Follows up until *resolved*

Munshi doesn't give up after one ignored message. It follows up with the right cadence, the right tone, until a definitive answer is logged. Pending tasks don't get lost.

ROUTED BACK

Owner only sees what matters

The owner doesn't see the back-and-forth. They see one clean update: "Mukesh confirmed, Wednesday 11 AM." Calendar updated. Done.

Bookkeeping that *writes itself*.

Rajesh has two business bank accounts. *Until two weeks ago, he shared PDF statements monthly. His accountant typed them in. Errors crept in. Reconciliation was always a week late. Now Munshi reconciles in real time, with consent.*

**Munshi • Sharma Mithai**

AA-linked • 2 accounts

Rajesh ji, one-time setup. Apke business bank accounts ko link karne ke liye consent chahiye — RBI ke Account Aggregator framework ke through.

Link share karne ke baad, hum sirf statements dekh sakte hain. Paisa nahi nikal sakte. Aap kabhi bhi consent revoke kar sakte hain.

Day 5 • 11:00 AM

Setu AA portal link: setu.co/aa/munshi/sharmamithai
2 minutes. SBI + Axis dono link kar dijiye.

11:00 AM

✓ Done.

11:08 AM ✓✓

2 weeks later • Day 19

Daily reconciliation summary

₹62,400 received from 18 customers (UPI + cards)

₹38,200 paid: ₹28k Jain Brothers (pista delivery ✓), ₹6.2k electricity, ₹4k staff advance

Matched to records: 100%

Cash position: ₹8,66,200

Anything unusual? Nahi — sab regular.

6:30 PM ✓✓

CONSENT-BASED

RBI-regulated. Owner-controlled.

Munshi never sees passwords. Never moves money. Access is read-only, time-bound, revocable at any moment through the AA framework. Privacy is the design.

THE MATCHING ENGINE

Bank ↔ invoices ↔ vendors

Every bank transaction matched against Munshi's internal records — the invoice raised, the vendor paid, the inventory received. Reconciliation is automatic.

OWN-ACCOUNT ONLY

No counterparty surveillance

Munshi reads the owner's bank — not the customer's, not the vendor's. We are a tool for the owner, not a surveillance system. Deliberate scope choice.

Warned *before*. Not after.

Last Diwali, Rajesh ran out of cashews mid-rush. Lost ₹40,000 of orders to the shop next door. He didn't know until customers asked. Now Munshi tracks consumption patterns and warns him before the gap, not after.

 **Munshi • Sharma Mithai**
predictive inventory

 **Stock alert — Vijay Nagar outlet**

Cashews (kaju) stock: 3.2 kg
Average daily consumption: 1.4 kg
Stock-out in ~2.3 days

Festival season starting Friday — consumption likely to 3x. Recommend reorder of **15 kg by Wednesday morning**.

Last 3 orders: Jain Brothers @ ₹1,150/kg. Same?
Tuesday 9:14 AM

✓ Reorder placed — Jain Brothers, 15 kg @ ₹1,150/kg = ₹17,250. Delivery Wednesday 10 AM. Suresh ji ko verify karne ke liye bol diya.
9:16 AM

Wednesday 10:42 AM

✓ **Delivery verified.** Suresh ji ne photo bheji. 15 kg confirmed. Quality good. Stock updated. Payment scheduled Friday (Jain Brothers' usual cycle).

Festival ke liye taiyar ho.
10:42 AM

Haan, kar do. 15 kg.
9:16 AM ✓✓

PREDICTIVE, NOT REACTIVE
Consumption + season
Munshi tracks how fast each SKU moves at each outlet, then accounts for upcoming events — festivals, weekends, weather, local demand spikes. Alerts fire days in advance.

ONE-TAP ACTION
Approve. Munshi does the rest.
The owner says "haan" — Munshi places the order with the right vendor, schedules verification with the right staff, queues payment in the right cycle.

THE COMPOUNDING MOAT
The matching engine *learns*
Every reorder cycle teaches Munshi the customer's consumption rhythm, vendor reliability, typical lead time. Predictions get sharper with every cycle.

WHAT YOU JUST SAW

One owner. One day. *Six flows that used to live in the owner's head.*

Munshi doesn't ask the owner to learn a new system. It runs the orchestration that was already happening — just verified, real-time, and on a channel everyone already speaks.

FOR THE OWNER

3 hours of follow-up → 8 minutes of summary.

FOR THE WORKER

No app. No training. Voice and photos in their language.

FOR THE VENDOR

Same WhatsApp messages. Zero adoption friction.

FOR THE BOOKS

AA-linked, real-time reconciliation. Audit-ready.

FOR THE STOCK

Warned before. Reordered automatically. Verified on arrival.
